2 Use 100% when you are stating mathematical thought like statistics. Use "one hundred percent" when you are stating non-mathematical thought like a story.

People often say that percentages greater than 100 make no sense because you can't have more than all of something. This is simply silly and mathematically ignorant. A percentage is just a ratio

Accurately estimate solar panel output by location. Enter local irradiance, panel wattage, and efficiency to calculate daily and yearly solar energy yield for any region.

Use Solar Panel Output Calculator to find out the total output, production, or power generation from your solar panels per day, month, or in year.

"100% correct" is grammatically correct in this context, though the organization of the sentence is a bit atypical for many more formal dialects of English and may be difficult for some

Approximately 100 to 150 watts of solar energy can be generated per 100 square meters, depending on various factors, including location, solar panel

37 Wikipedia lists large scale numbers here. As only the 10 x with x being a multiple of 3 get their own names, you read 100,000,000,000,000,000,000 as  $100 * 10^{18}$ , so this is 100 quintillion

The flow rate increases 100-fold (one hundred-fold) Would be a more idiomatic way of saying this, however, the questioner asks specifically about the original phrasing. The above Ngram

This article explores solar energy per square meter and the various factors that influence energy output, such as location,

I wouldn't be at all surprised if using buck to mean "one hundred" in a general sense that is applicable to various units of measure (such as "100 miles per hour" in your example) goes back
