Explore how distributed energy storage drives business model innovation, enabling virtual power plants, energy-as-a-service, peak shaving,

Geothermal energy, a clean, continuous energy source accessible in many locations, has been slow to catch on. Nearly 2,000 years ago, the Romans made extensive use of geothermal

Investigators in the MIT Energy Initiative and the MIT Plasma Science and Fusion Center have found that -- depending on its future cost and performance -- fusion energy has the potential

A look at how AI can be used to help support the clean energy transition by helping to manage power grid operations, plan infrastructure investments, guide the development of novel

Contemporary Amperex Technology Co., Limited (CATL) is a global leader in new energy innovative technologies, committed to providing premier solutions and services for new energy applications

As MIT's first vice president for energy and climate, Evelyn Wang is working to broaden MIT's research portfolio, scale up existing innovations, seek new breakthroughs, and channel

MIT News explores the environmental and sustainability implications of generative AI technologies and applications.

Arup has worked on electricity storage projects covering several technologies including innovative solutions such as liquid air, flywheel, gravity based, hydrogen, and compressed air energy storage,

We help clean energy producers store and dispatch energy by providing development, design, integration and management services to create reliable storage systems.

Reinvent energy storage with us. Energy Vault partners closely with customers to identify, develop, and deploy solutions that
