Hello everyone, I just bought my first car, a 2014 Volvo V40 T3, and a warning appears on the dashboard that says "low battery charge." The car is recently...

Going to change the service battery in my 15 V40cc D2. Anything I need to be ware of or look out for ??

The low battery charge message relates to the main battery. On vehicles with stop/start systems and intelligent alternators, the vehicle battery is designed to operate at around 80% SOC, to

So I think the time has come to replace the main battery. Its the original Volvo 70ah EFB battery that was on the car from new in 2016.. The car starts fine but I keep getting the "Low Battery

TBH I would look at a replacement battery on the back of that info - but can't you get one from where you bought it? I don't know what a compliance centre is but does the vehicle come with

Household battery recycling locations Lead-acid batteries, or "automotive type batteries," are banned from disposal. Consumers may bring lead-acid batteries to any Wisconsin retailer that sells these

My main battery just died, had it replaced with same, and car kept giving me Battery charging, so no stop start. When stop/start worked, it was for about 10 sec, and car would start, with

Hiya, I have an early 2014 D2 cross country automatic. It keeps complaining about battery level, even after our (rare but very long drives). So I think the battery is shot. Funnily, when I put my

I've had both batteries replaced (with the correct models), done a 100 mile trip, overnight smart battery charge, charging voltage is fine, system messages cleared but I am still getting "low

Utility-scale battery energy storage systems (BESS) are large-scale energy storage installations--typically in the megawatt (MW) and megawatt-hour (MWh) range--designed to support
