Antora builds and deploys thermal energy storage to power always-on industrial operations with low-cost energy. Factory-built in the United States, Antora's thermal batteries deliver reliable and cost

Since closing its Series A in 2022, the company has launched its commercial-scale thermal battery product aimed at sectors like cement and steel, and opened a manufacturing facility

Explore 120 energy projects in California, including solar, wind, and other energy developments with detailed plant-level data.

As a premier engineering firm, we specialize in delivering turnkey projects that redefine how energy is produced, stored, and managed.

We have delivered hundreds of projects covering most of the commercial applications such as demand charge management, PV self-consumption and back-up power, fuel saving solutions, micro-grid and

Antora Energy is scaling up in north San Jose, snapping up additional space and increasing hiring as demand surges for its industrial energy storage tech.

Antora builds and deploys thermal energy storage to power always-on industrial operations with low-cost energy. Factory-built in the United States, Antora's thermal batteries deliver reliable and cost

California's Renewable Energy Design-Build Contractor We design, build, and support solar and storage systems for commercial, industrial, public sector, new construction, and retrofit clients across California.

The project is expected to be completed in 2025 and provide resource adequacy support to electric utility Pacific Gas and Electric (PG& E). It

Explore our portfolio to see how we're powering progress with cutting-edge energy storage solutions that enhance grid reliability, enable renewable integration, and drive long-term sustainability.
