The new Schmidt Laboratory for Materials in Nuclear Technologies (LMNT) at the MIT Plasma Science and Fusion Center accelerates fusion materials testing using cyclotron proton beam

MIT News explores the environmental and sustainability implications of generative AI technologies and applications.

Grid operators are throttling EV charging at peak hours. Learn how Battery Energy Storage Systems (BESS) eliminate grid strain, cut demand charges, and enable 24/7 fast charging -- with

Explore how scalable modular BESS containers solve grid strain & high costs for EV fast-charging. Expert analysis on LCOE, safety (UL/IEC), and real-world deployment for commercial success.

By combining high-speed charging, integrated energy storage, smart management, and modular design, these systems provide reliable and rapid EV charging for commercial fleets, public charging stations,

As MIT's first vice president for energy and climate, Evelyn Wang is working to broaden MIT's research portfolio, scale up existing innovations, seek new breakthroughs, and channel

Investigators in the MIT Energy Initiative and the MIT Plasma Science and Fusion Center have found that -- depending on its future cost and performance -- fusion energy has the potential

At the MIT Energy Initiative's Annual Research Conference, industry leaders agreed collaboration is key to advancing critical technologies amidst a changing energy landscape.

What is Spain's energy storage program? For stakeholders in battery storage, thermal storage, and pumped hydro, this program offers not only financial backing but also long-term stability and political

MIT engineers developed a membrane that filters the components of crude oil by their molecular size, an advance that could dramatically reduce the amount of energy needed for crude oil
