AECTP method 310 evaluates the integrity of material when subjected to rain. As an ISO-17025 accredited environmental compliance test lab, we realize the importance of rain and water tightness

e testing and certification services. These services benefit end users, such as electrical utility companies and commercial businesses, producers of energy ble for large-scale outdoor projects. Whether you

MIT engineers developed a membrane that filters the components of crude oil by their molecular size, an advance that could dramatically reduce the amount of energy needed for crude oil

At the MIT Energy Initiative's Annual Research Conference, industry leaders agreed collaboration is key to advancing critical technologies amidst a changing energy landscape.

UL 9540A Battery Energy Storage System (ESS) Test Method With the technical foundation for battery ESS large-scale fire testing firmly in place, UL engaged Standard Technical Panel 9540 in 2019 to

Geothermal energy, a clean, continuous energy source accessible in many locations, has been slow to catch on. Nearly 2,000 years ago, the Romans made extensive use of geothermal

Investigators in the MIT Energy Initiative and the MIT Plasma Science and Fusion Center have found that -- depending on its future cost and performance -- fusion energy has the potential

This is where MIL-STD-810H testing plays a critical role. Specifically, MIL-STD-810H Method 506.6 rain test and MIL-STD-810H Method 510.7 sand and dust test define standardized

A look at how AI can be used to help support the clean energy transition by helping to manage power grid operations, plan infrastructure investments, guide the development of novel

This test is conducted on the smallest individual battery cell within the Battery Energy Storage System (BESS). A reliable and repeatable method is
