Massachusetts Clean Energy Center CEO MBA '12 Emily Reichert highlights the state government's unique approach to fostering and keeping clean energy innovation.

At the MIT Energy Initiative's Annual Research Conference, industry leaders agreed collaboration is key to advancing critical technologies amidst a changing energy landscape.

The new Schmidt Laboratory for Materials in Nuclear Technologies (LMNT) at the MIT Plasma Science and Fusion Center accelerates fusion materials testing using cyclotron proton beam

Geothermal energy, a clean, continuous energy source accessible in many locations, has been slow to catch on. Nearly 2,000 years ago, the Romans made extensive use of geothermal

MIT News explores the environmental and sustainability implications of generative AI technologies and applications.

Explore innovative shipping container energy storage systems for sustainable, off-grid power solutions. Harness renewable energy storage

Complete 2026 buyer's guide to 1.2 MWh BESS containers -- system configuration, liquid cooling technology, ROI data, and why SolarEast is the preferred C& I manufacturer for global projects.

A look at how AI can be used to help support the clean energy transition by helping to manage power grid operations, plan infrastructure investments, guide the development of novel

Investigators in the MIT Energy Initiative and the MIT Plasma Science and Fusion Center have found that -- depending on its future cost and performance -- fusion energy has the potential

Container energy storage, also commonly referred to as containerized energy storage or container battery storage, is an innovative solution designed to address the increasing demand for efficient and
