Ghana's Energy Transition Framework (2022-2070) outlines a path to achieving net

The new Schmidt Laboratory for Materials in Nuclear Technologies (LMNT) at the MIT Plasma Science and Fusion Center accelerates fusion materials testing using cyclotron proton beam

Investigators in the MIT Energy Initiative and the MIT Plasma Science and Fusion Center have found that -- depending on its future cost and performance -- fusion energy has the potential

MIT News explores the environmental and sustainability implications of generative AI technologies and applications.

The National Energy Transition Framework is a national strategy developed by the Government of Ghana through the Ministry of Energy to guide the country's transition from primarily fossil-fuel based energy towards a low-carbon, sustainable energy system. The framework was launched in 2022 and forms part of Ghana's broader climate, energy policy and development agenda, aligning with international climate commitments and the National Energy Transition Plan (2022-2070)

MIT engineers developed a membrane that filters the components of crude oil by their molecular size, an advance that could dramatically reduce the amount of energy needed for crude oil

Ghana recently unveiled an energy transition and investment plan to achieve net zero emissions by

An Onshore Petroleum Exploration and Production Policy for the upstream petroleum subsector was

At the MIT Energy Initiative's Annual Research Conference, industry leaders agreed collaboration is key to advancing critical technologies amidst a changing energy landscape.

Ghana's renewable energy transition is essential for economic resilience and energy security. While policy frameworks exist, progress has

Energy transition ghana
