Through the International Environmental Technology Centre (IETC), UNEP promotes a holistic approach that begins with waste reduction and reuse, and supports the introduction of

We have deployed Solar Power Container units at three of our mines and the results have been

Are green communication networks a common energy consumption problem? Vinay et al. present an

How is the health of our planet doing right now, and what does that mean for us? What indicators show the current state of global environmental health, and what policy priorities should address them?

Grid-interactive solar PV inverters must satisfy the technical requirements of PV energy penetration

Education is powering environmental action: five ways schools, youth programmes and universities build skills, leadership and solutions to restore nature.

The United Nations Environment Programme provides open-access scientific, technical and policy resources to support evidence-based decision-making for a sustainable planet. These include

Our professional solar solutions are designed for commercial, industrial, and utility applications across Southern Africa and beyond. Download "Environmental issues of solar container communication

The sprawling data centres that house AI servers churn out toxic electronic waste and are voracious consumers of electricity, which in most places is still produced from fossil fuels.

This comprehensive review examines grid-connected inverter technologies from 2020 to 2025,
