During off-peak hours, ice is made and stored inside energy storage tanks. The stored ice is then used to cool the building occupants the next day. Thermal ice

That perfect combination of "where have you been all my life" and "how did I ever live without this"? That's exactly the sensation waiting for you at Debby's Diner in Medford, Oregon - a

Debby's Diner, Medford: See 44 unbiased reviews of Debby's Diner, rated 4.3 of 5 on Tripadvisor and ranked #37 of 231 restaurants in Medford.

OverviewAir conditioningEarly ice storage, shipment, and productionCombustion gas turbine air inlet coolingThe most widely used form of this technology can be found in campus-wide air conditioning or chilled water systems of large buildings. Air conditioning systems, especially in commercial buildings, are the biggest contributors to peak electrical loads seen on hot summer days in various countries. In this application, a standard chiller runs at night to produce an ice pile. Water then circulates through the pile during the day to produce chilled water that would normally be the chiller's daytime output.

At Debby's Diner, you can expect great coffee, a wide selection of teas, and delicious desserts. Our menu offers a variety of options, including comfort food, quick bites, and small plates. We also have a
