A photovoltaic (PV) cell, commonly called a solar cell, is a nonmechanical device that converts sunlight directly into electricity. Some PV cells can convert artificial light into electricity. Sunlight is composed

Photovoltaic (PV) technologies - more commonly known as solar panels - generate power using devices that absorb energy from sunlight and convert it into electrical energy through semiconducting

Perplexity is an AI search engine that delivers fast, clear answers with real-time insights. Get reliable information without sifting through endless links.

Photovoltaic technology lets you generate electricity from a renewable source: the sun. Unlike traditional methods of electricity generation, which often rely on fossil fuels, photovoltaics...

Perplexity Computer unifies every current AI capability into a single system. Computer is a general-purpose digital worker that operates the same interfaces you do.

Solar photovoltaic (PV) technology has emerged as a key renewable energy solution, yet its widespread adoption faces several technical and economic challenges.

Perplexity Computer -- an agentic AI assistant that uses your computer to complete tasks for you, from booking travel to filling out forms.

The conversion of sunlight, made up of particles called photons, into electrical energy by a solar cell is called the "photovoltaic effect"; - hence why we refer to solar cells as "photovoltaic", or PV

What is the Perplexity API or Sonar for? Designed for developers and businesses integrating Perplexity's AI into their own products Pay-as-you-go pricing: Buy credits or set up auto top-off No
