---

MPMC mobile power solutions for mining industry covers all ranges from 6kVA to 3000kVA diesel gensets, manual and hydraulic light towers, hybrid light towers, gas generators and hybrid power

Combining diesel generation, battery storage, and solar power under an intelligent energy management system, it delivers flexible and adaptive power strategies to replace conventional diesel-only

Whether providing industrial engines for the toughest mining machinery or integrated power systems for operation in harsh environments, Cummins designs reliable power solutions for

GE Vernova Gas Power delivers power generation and distribution systems that can help meet the needs of mining operations for cost-effective, reliable, and readily available power.

Optimizing mine power by balancing CAPEX, OPEX and up time of electric power at every phase of a mine. With longer maintenance intervals, higher fuel efficiency and competitive repair options,

GE Vernova Gas Power delivers power generation and distribution systems that can help meet the needs of mining operations for cost-effective, reliable, and

Flexible and expandable power system with open ring network architecture. This power system design is recommended for a lithium extraction site using brine pumped from salt lakes (also called salars),

Combining diesel generation, battery storage, and solar power under an intelligent energy management system, it delivers flexible and adaptive power strategies to

Elgin Power Solutions builds rugged power centers for underground mining and heavy industrial use, delivering safety, power reliability, and simplified integration.

Cat#174; power generators for mining are trusted by large mining operations & small quarries to customize power systems for every mining phase. Learn more.
