By using this service, users can see the patent family for a specific application, containing all related applications filed at participating IP Offices,

The present technology includes articles of manufacture, systems, and processes that relate to a solar panel mounting bracket and a solar panel foundation system.

A mounting bracket for a solar panel foundation system is disclosed. The mounting bracket can include a top panel having a first side panel and a second side panel extending therefrom.

Search specific patents by importing a CSV or list of patent publication or application numbers. The invention discloses a photovoltaic bracket.

A powerful, flexible web-based patent search application that improves the overall patent searching process. It includes two user selected interfaces that provide enhanced access to prior art.

By using this service, users can see the patent family for a specific application, containing all related applications filed at participating IP Offices, along with the dossier,

Search and read the full text of patents from around the world with Google Patents, and find prior art in our index of non-patent literature.

**ABSTRACT** A roof mount system supports a solar panel above a roof and includes a base positioned on the roof and a first fastener connected to the base and extending away from the roof and moveable

Search specific patents by importing a CSV or list of patent publication or application numbers.

U.S. patent number D864,854 [Application Number D/577,432] was granted by the patent office on 2019-10-29 for solar panel mounting bracket. This patent grant is currently assigned to ORION
