Operating across Sri Lanka, India, and the SAARC region, delivering energy storage solutions where they're needed most. Specialized in large-scale BESS

Sri Lanka introduces large-scale battery energy storage systems for the first time, marking a breakthrough in the nation's renewable energy transition.

Sri Lanka greenlights battery storage plan with Cabinet approval for a large-scale rollout of Battery Energy Storage Systems (BESS), marking a significant step in modernizing the country's

SRI is a leading American nonprofit research institute that's created some of the world's most important innovations. But we wouldn't be where we are without our people. Learn more about us -- and how

Under the revised plan, Sri Lanka will advance the commissioning of 300 MW of battery energy storage capacity, originally scheduled for 2031-2032, to the 2028-2029 period.

We use gold-standard methods such as evidence-centered design and Universal Design for Learning and leverage SRI technologies such as artificial intelligence, speech recognition, video

SRI is a leading American nonprofit research institute creating some of the world's most important innovations.

SRI International, originally the Stanford Research Institute (SRI), is a nonprofit scientific research institute and organization headquartered in Menlo Park, California, United States. It was established

Sri Lanka's Cabinet has approved a proposal to procure 300 MW of Battery Energy Storage Systems (BESS) to stabilize the growth of renewable energy, minister Nalinda Jayatissa said.

Based on an extensive evaluation of various energy storage technologies, four (4) key solutions have been identified as the most suitable options for Sri Lanka which can be implemented over the next
