The overall environmental friendliness of wind power generation is relatively high, mainly reflected in its significant advantages as a clean energy

Worldwide animated weather map with layers, precise forecasts, METAR, TAF, NOTAMs for airports, SYNOP codes from stations and buoys, and forecast models.

Windy provides real-time wind maps and weather forecasts.

Weather radar, wind and waves forecast for kites, surfers, paragliders, pilots, sailors and anyone else. Worldwide animated weather map, with easy to use layers and precise spot forecast.

Wind turbines do not release emissions that can pollute the air or water (with rare exceptions), and they do not require water for cooling. Wind turbines may also reduce electricity

Wind turbines are a clean and sustainable energy source, producing no toxic pollution or global warming emissions. They are abundant, inexhaustible, and affordable, offering a significant

Rio de Janeiro weather forecast. Meteogram, airgram, wind, clouds, temperature, humidity and dew point forecast. ECMWF, WRF, GFS, NAM, NEMS and other forecast models.

Wind energy generation avoids substantial amounts of carbon dioxide emissions compared to fossil fuels. Studies indicate that for every kilowatt-hour

Windy provides real-time wind maps and weather forecasts with animated worldwide coverage and precise spot predictions.

While natural gas and oil are integral to a wide range of applications including electricity generation, heating and transportation, wind energy is confined to only

Wind power generation is really environmentally friendly
